I guess what I'm looking for is the FAQ doc. ComStrat I got last night had both combined but they've been removed from attachment so now I need latest FAQs.

Thanks,

Can someone please send me the final version of the NPL listing ComStrat? The version I have is apparently an earlier version.

Thanks,

Subject: Final two Q&As for COMSTRAT

Hi, Greg.

Below are answers to the two questions that were pending for the BPMD NPL listing Communication Strategy.

Cynthia

34. Will EPA have enough funding from Congress to complete the needed remedial activities?

EPA must first complete its investigation of the mining district to characterize the nature and extent of contamination. That work has begun and is sufficiently funded to proceed without delay. Until we complete our investigation, it is premature to speculate about the design and cost of remedial activities. EPA is funded by Congress on an annual basis, and there is a good track record of timely remediation on mine sites in Colorado.

35. Having EPA personnel and contractors in the field is straining San Juan County's emergency response capabilities. What will EPA do to help the county meet the increased workload?

EPA is coordinating our activities in the mining district with San Juan County's emergency response office to ensure awareness of how many people are in the mining district and

where they are working. EPA personnel are equipped with communication devices that provide service in remote areas.
